

## ROYAL BAKING POWDER

Thousands of millions of cans of Royal Baking Powder have been used in making bread, biscuit and cake in this country, and every housekeeper using it has rested in perfect confidence that her food would be light, sweet, and perfectly wholesome. Royal is a safeguard against the cheap alum powders which are the greatest menaces to health of the present day.

**ROYAL IS THE ONLY BAKING POWDER  
MADE FROM ROYAL GRAPE CREAM OF TARTAR**

### SOLDIER WAS MAKING THINGS LIVELY AT STATION

Officer Cooper was called to attend to an obnoxious individual more or less under the influence of liquor yesterday, who was making things lively in the vicinity of Union station. The man was Charles M. Nelson and he claimed to have been robbed of a sum of money. He said he is a soldier.

The officer started for police headquarters with him, but had considerable difficulty in handling him. At the station Nelson was searched and the officers were surprised to find a considerable sum of money upon him. As soon as the money was discovered, Nelson weakened on the robbery story and asked that the officers "call it off." He had also previously preferred charges against the officer, who, he said, had kicked him out of the station. These statements he also desired to retract. He was locked up and advised to indulge himself in a quiet siesta.

The man proved to be a walking library of government papers. Among those taken from his person were numerous honorable discharge and enlistment papers, showing that he had served in the regular army at different points for many years, each time re-enlisting for another term. Some of the papers had been issued from army posts in the Philippine Islands,

one showing that he had been appointed a corporal. A careful perusal of these documents gradually turned the opinion of the police in the prisoner's favor until a certain yellow sheet was examined. This document proved to be a "Dishonorable Discharge" from the army at Fort Douglas, and was dated April 18, 1909, since which time he had probably been loafing in Salt Lake and Ogden. No cause was assigned for the discharge and until the man sobers sufficiently to explain, the cause of his ultimate downfall will be a mystery.

### STOCKHOLDERS NOTICE.

Notice is hereby given that a meeting of the stockholders of the Ogden Packing and Provision company will be held at the office of said company in Ogden City, Utah, on the 14th day of May, 1909, at the hour of 10 o'clock a. m. for the purpose of amending the articles of incorporation of said company by striking out the paragraph of section eight of said articles relating to the employment of Mr. F. E. Schlager as general manager of the corporation and adopting in lieu thereof a paragraph providing for the employment of a general manager of said company.

SIMON S. JENSEN,  
Secretary.

Dated at Ogden, Utah, April 13th, 1909.

## ADDRESS TO OGDEN HIGH SCHOOL

PROF. ENOS A. MILLS TALKS TO INTERESTED AUDIENCE.

Wood, an Indispensable Material—Value of Forests and Their Influence Upon Climate.

Mr. Enos A. Mills, of the Forest Service, spoke to a large and appreciative audience at the Congregational church Tuesday at 11:30 a. m., the meeting being held for and under the auspices of the High school. An overture by the High school orchestra, under the leadership of Miss Conroy, and the rendition of "Love's Old Sweet Song," by the Glee club, added much to the occasion.

Mr. Mills was introduced by Prof. J. O. Cross, principal of the High school, and said in part:

"No nation has ever fallen for having too many trees, but scores of lands have been depopulated and brought to ruin through forest destruction. Most of the great nations of which history gives account have been rich in natural resources, and the one resource most useful to and most used by every nation that has built itself to greatness was the forest. It is probable that the forests of the United States have been the most important resource to those who settled here. When the first settlers landed upon the Atlantic coast they first of all cut down the trees and used them to build themselves homes. They used wood for fuel, furniture, boats, bridges, churches, forts, and stockades. Not only the first settlers used wood freely, but pioneers in every state and territory found wood to be the most helpful to them. As the population of the country increased, wood continued to be useful in the development of the various resources of the country. It seems hardly possible that the mines could have been worked without timbers for them which were cut out of the forest. It seems unthinkable that there could have been much early inland transportation without forests, which supplied material out of which the boats were built.

"Thus from the first settlement down to the present time the forests have constantly been called upon to contribute to almost every constructive work—all of which ultimately enabled our nation to become what it is.

"But the uses of wood are not yet ended. It is now being used more freely than ever before. It is true that many substitutes have been found for it; but on the other hand, so many new uses have been found for it that at the present time the annual per capita use was never exceeded in years of the past.

"At the present time approximately 100,000,000 acres of forest are cut down and used every twenty-four hours. Most of this timber is well used. It is used to develop the country and sustain the industries. But the unfortunate thing in connection with the timber, or the forestry question at present is that at the present rate of usage the forests of the United States will be exhausted in less than 20 years. In other words, a timber famine is near, and a timber famine will have a devastating effect upon those industries that are dependent upon regular supplies of wood; and as wood is so generally and so largely used, this timber famine will probably mean almost a calamity for the entire people of the nation.

"To meet this serious situation, forestry ought to be once extensively practiced upon the woodlands of the United States. Forestry really means to farm with trees. Forestry embraces tree planting, tree producing, and tree harvesting. The two important things of the forestry question which seems to need immediate and general attention are the fuller utilization of all timber cut, and the prevention of forest fires.

"The practice of forestry is not new. It has been followed by European nations for several generations. Each nation that has practiced forestry has in many ways profited by doing so. On the other hand, some nations have endeavored to get along without practicing forestry, but these nations have suffered severely for their neglect of this important question. China, Spain, and Syria are countries that have neglected their forests. Japan, Germany, and France are nations that have long been giving forestry considerable attention.

"In the United States a beginning in forestry has been made, but only a beginning. One hundred and eighty million acres of woodland are now in charge of the United States Forest Service. Fourteen of these woodlands are receiving but scant attention as a result of meager appropriations. It has been demonstrated through the experience of European countries, that forestry is not only something that can be profitably practiced but incidentally that the indirect help or influence of the living forests are so many and so important that they are well worth considering for their own sake. Wherever a forest is growing, it has the characteristic of heating and cooling. It thereby tends to prevent sudden changes of temperature. Sudden changes of temperature are annoying to the people and damaging to the farmer, who is after all the only necessary man. Forests are also wind breaks and wind breaks for a house, barn or an orchard have a very high value and incidentally they are worth considerable in connection with the growing crops of the field.

"The forest shelters and helps to sustain many kinds of useful birds; many species of birds which live mainly upon weed seeds and injurious insects have their home in the forest.

"Probably the most important forest influence that is helpful to the people of the west is its power to check the evaporation of water. The western winds are extra dry and the western air is constantly absorbing water. It is insatiable. In many western localities the air has the capacity to absorb more water than annually falls. Hence, the important thing in conserving water is to shelter it from the thirsty winds. One of the most faithful, successful and extensive agencies for doing this is the forest. It is a well known fact that in the

west in the open unsheltered places, the amount of water evaporated is from five to ten times as great as within the forest. Hence the value of the forest in sheltering and conserving the water supply is very great. By extending the forests on the hills and mountains of the west so that they would cover and better shelter most of the various streams sources would mean an increased flow of water in the stream, simply because the forest would check evaporation of the forest is done directly by getting the precipitation quickly into the ground. As most of the irrigation water used in the west falls at the stream sources long before it can be used for irrigation purposes, it is important that the runoff of this water be saved. This is what the forest does by getting water into the ground. The water seeps away by slow subterranean drainage instead of running off by rapid surface drainage. Then again the shade and sheltering influence of the forest on the snows deposited on the mountain side the soil gradually melts. In other words, snow within a forest will remain unmelted far longer than the snows in unsheltered places.

Wherever a forest is growing its countless roots and rootlets anchor the soil and prevent the soil from being washed away. Forests create soil and even within a forest on a steep hill or mountain side the soil gradually becomes deeper and richer, but destroy this hill or mountain side forest and the soil begins to wash rapidly away. There are many other uses of the forest of which time will not allow even a mention, but it should never be forgotten that as places of recreation, as places to go in which to rest the mind or body, they are of the very best.

"The numerous uses of wood and the many influences of living forests really give them a large part in the general welfare. Their uses are public uses and it is a public function to see to the care, improvement and perpetuation of the forest. It seems probable that in a short time all of the forests will have been seen to through state and national legislation and that we may have the best of forestry legislation, would it not be well for all to have an elementary knowledge of the forest and to understand the part which they play in our life? To this end, and with a view to having a little elementary forestry taught in all the schools in the land?"

A lay liver leads to chronic dyspepsia and constipation—weakens the whole system. Doan's Regulents (25 cents per box) correct the liver, tone the stomach, cure constipation.

### NOTICE

Scaled bids will be received by the Board of Education of Ogden City at their offices, room 202 Eccles Bldg., in Ogden City, Utah, until twelve o'clock noon, Thursday, April 29th, 1909, at which time and place said bids will be opened and if satisfactory, the contract awarded for the furnishing of all labor and materials necessary for all electrical work, and

wiring for a program clock system to be installed in the High School Building now in course of construction, situated at the intersection of 25th street and Monroe Avenue in Ogden City. Said work to be done in accordance with the plans and specifications prepared therefor by Architects Smith & Hodgson, which may be seen at their offices, room 312 Eccles Bldg., in Ogden City, or at the offices of said Board. Said Board reserves the right to reject any and all bids. A certified check, made payable to said Board, for a sum of money not less than five per cent of the amount of the bid, must accompany each bid, and the check of the successful bidder shall be forfeited in case he fails or refuses to enter into such contract and furnish the bond required by the Board. Said contract to contain, among other things, a stipulation that at least 20 per cent of the contract price may be withheld until said building is completed and accepted by said Board.

By order of the Board of Education of Ogden City.  
M. S. BROWNING, President.  
IVY WILLIAMS, Clerk.

### NOTICE OF INTENTION.

Notice is hereby given by the City Council of Ogden City, Utah, of the intention of such council to make the following improvements, to-wit:

To create all of 24th Street from Grant Avenue to Wall Avenue; all of Wall Avenue from 23rd to 24th Streets and all of Lincoln Avenue from 24th to 25th Streets, as a paving district, and to grade, pave and curb and gutter therein in the manner following, to-wit:

On 24th Street from Grant Ave. to Wall Avenue and on Lincoln Avenue from 24th Street to 25th Street, pave with 2 1/2 inches of asphaltum on a 6-inch concrete base, and on Wall Avenue from 23rd to 24th Streets build a concrete curb and gutter with curb 6 inches thick and fifteen inches deep and gutter 6 inches thick and 18 inches wide, and pave with 2 1/2 inches of asphaltum on a 6-inch concrete base, and to defray the costs and expenses of the same, estimated at Forty-Two Thousand (\$42,000.00) Dollars, by a local assessment, for a depth of 50 feet upon the lots, blocks, parts of lots and blocks, land and real estate within said district abutting and bounding upon the outer boundary lines of said streets.

The boundaries of the district to be benefited or affected are lines drawn 50 feet outward from and parallel to the outer boundary lines of said streets for the whole length thereof from Grant to Wall Avenues on 24th Street, and 24th to 25th Streets on Lincoln Avenue and from 23rd to 24th Streets on Wall Avenue.

For the payment of the costs and expenses of making said improvements the City Council intends to levy special and local taxes upon the lots, blocks, parts of lots and blocks, lands and real estate lying and being within the boundaries of said district to the extent of the benefits to said property by reason of said improvements.

The City Council will, on Monday, the 26th day of April, 1909, at 8 o'clock p. m., in the City Council Chamber, City Hall, Ogden, Utah, hear objections in writing from any and all persons interested in said local and special assessment.

Ordered by the City Council, March 29, 1909.  
E. P. BROWN, City Recorder.

By Thill Hancock, Deputy.  
First publication April 2, 1909.  
Last publication April 24, 1909.

### GOTCH SIGNS ARTICLES

Des Moines, April 20—Champion Frank Gotch and James Reimer of this

## It's the Riverdale High Patent Flour that is the Best

A favorite with both is the thin, firm, silk four-in-hand that will easily slide between the folds of a high band collar. On outing shirt or shirt waist it will be equally popular, for the time has now passed when the feminine mind can sit composedly by while men appropriate the most attractive neckwear.

It's here for all.
